- Belongs amongst the leading processors of recycled SBR and EPDM in the Czech Republic. We sell both in our country and all over the world.

GELPO

- Manufacture of products of crushed rubber (SBR, EPDM) bonded with polyurethane binders.

Over 11 years experience in tyre collection and processing

- Tyres from passenger vehicles
- Trucks tyres
- Tractors tyres
- Non-standard size tyres

- Producing Rubber granulate

20 years of development and production of rubber products

- Plates, tiles
- Antivibration, sound deadening and acoustic systems
- Sports surfaces, playgrounds
- Wide use in construction and engineering

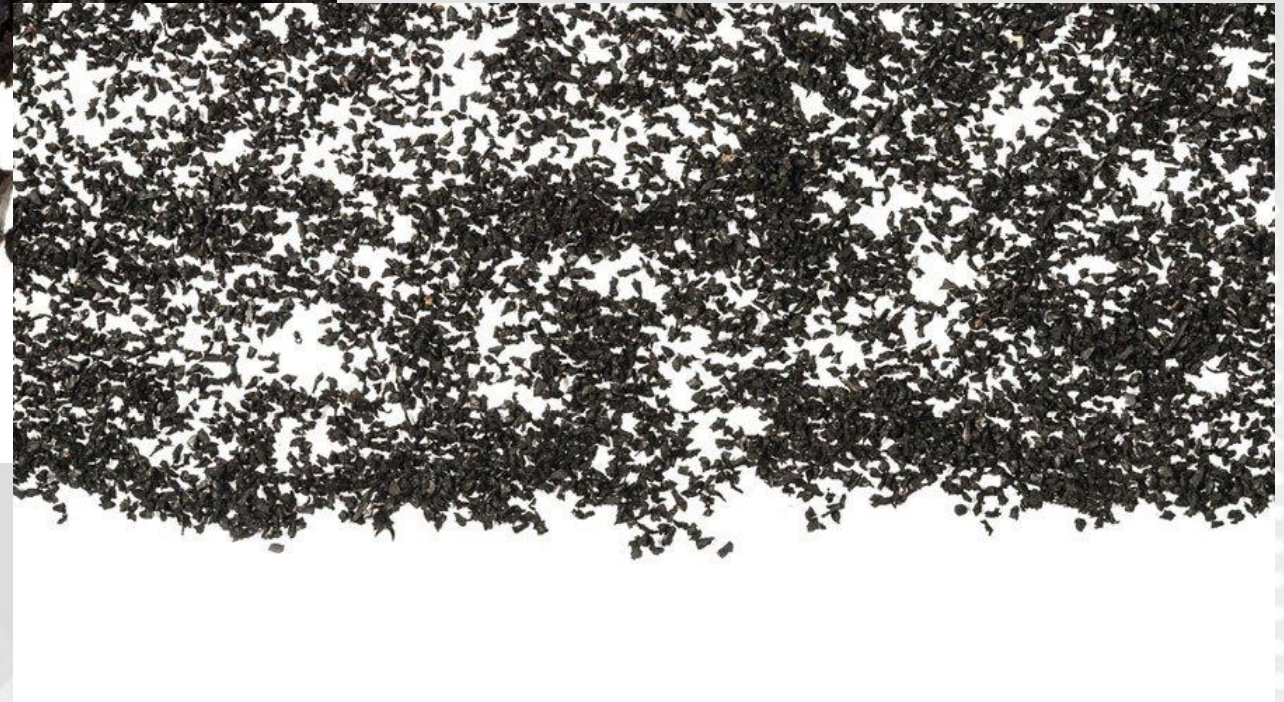

25 years of tradition in the production of EPDM granulate and SBR

- artificial sports surfaces
- Children's playground
- Playground subsoil
- Material for further production of products (tiles, soundproofing, insulating and anti-slip elements and others)

SBR GRANULATE – various fractions

By-product of the tyre recycling process

Textile fiber

Steel cord

Gumoasfalt

Material for further production

Sport's Infill

The underlying layer for children's playground

PRODUCTS FROM SBR GRANULATE

Tiles for agrosegment
cows and horses

Industry and transport products
- boards under load vibroizolation,
canals and other

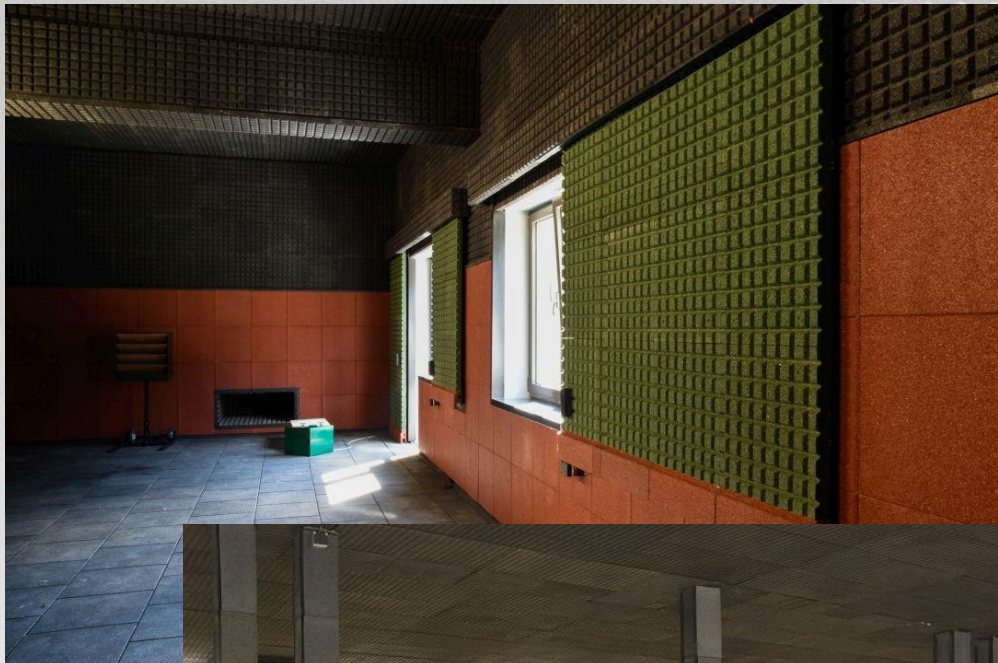

Playgrounds

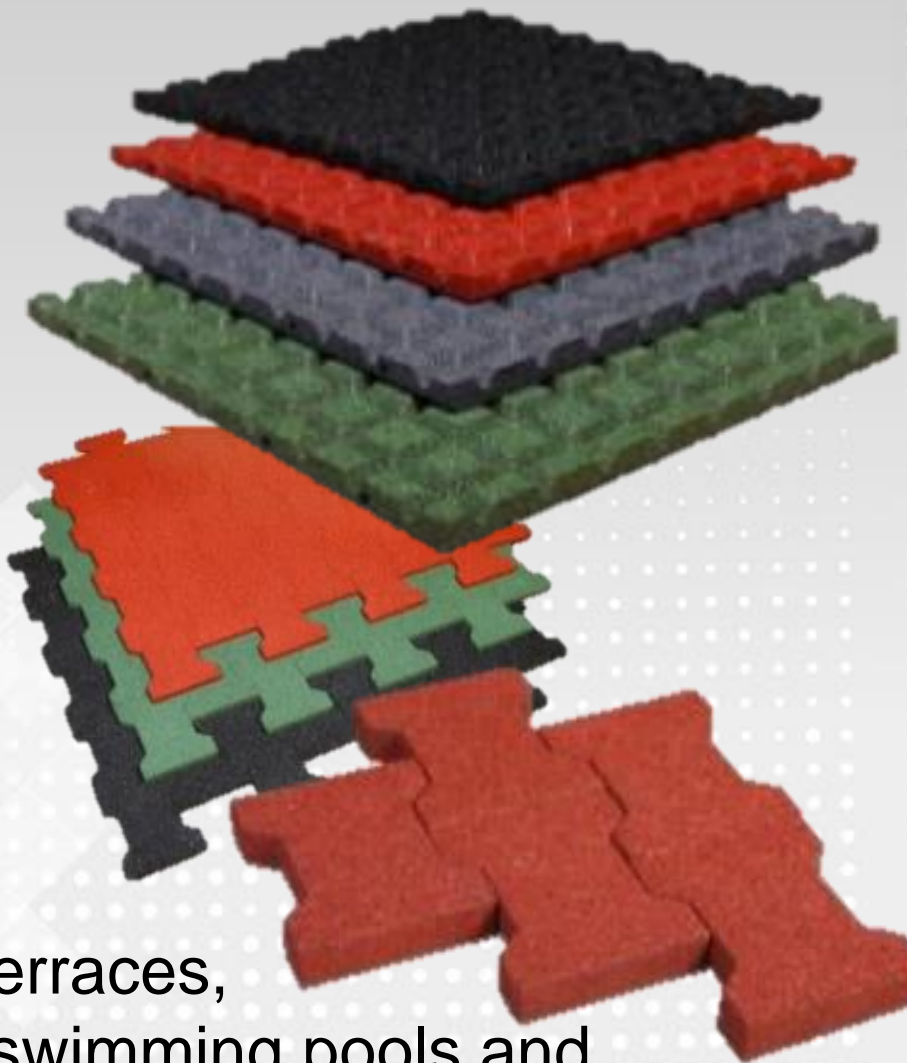

Fitness

Sports floor systems

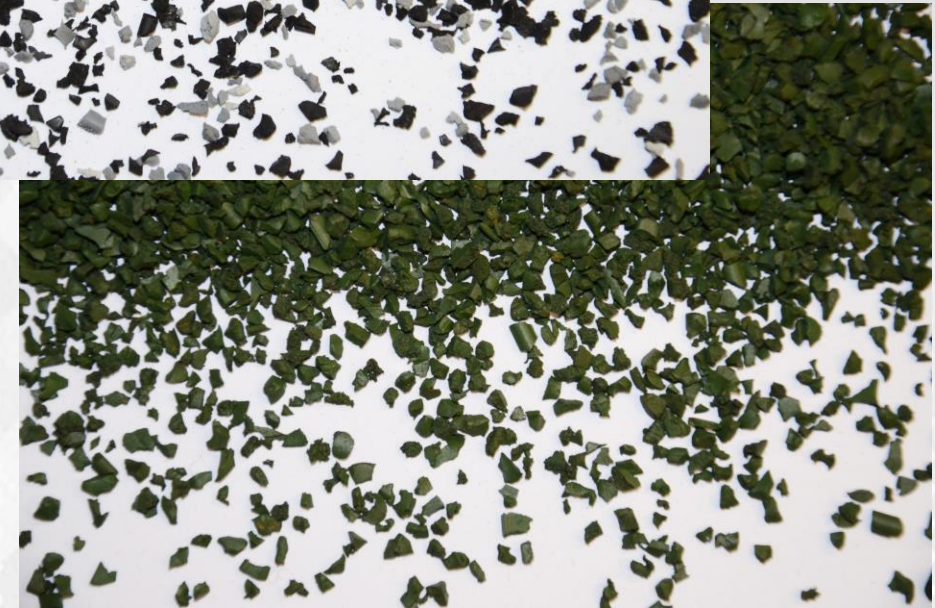

Boards for the shooting

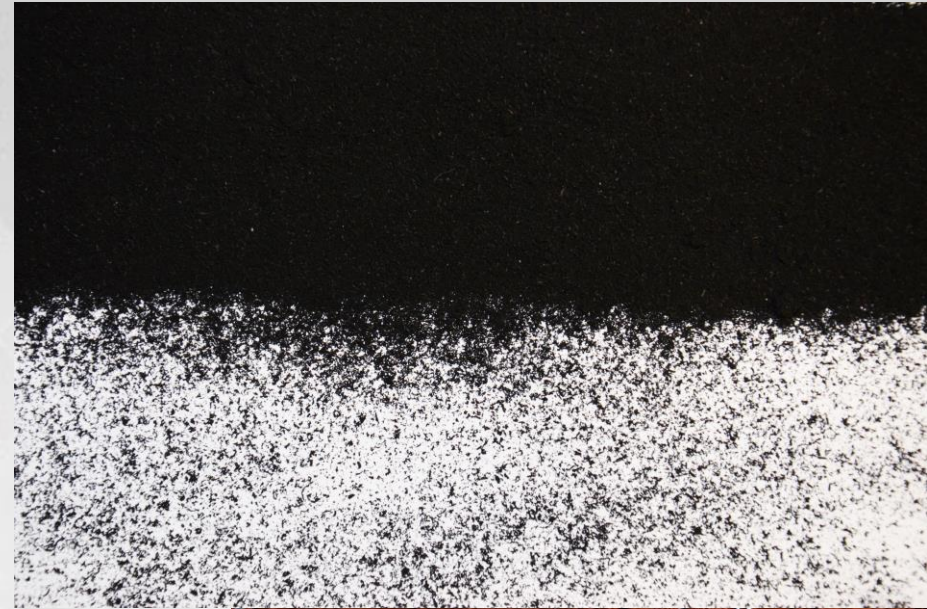

Floors for terraces, balconies, swimming pools and the surrounding area

EPDM GRANULATE – various fractions and colours

RUBBER CHIPPINGS – various fractions, colours

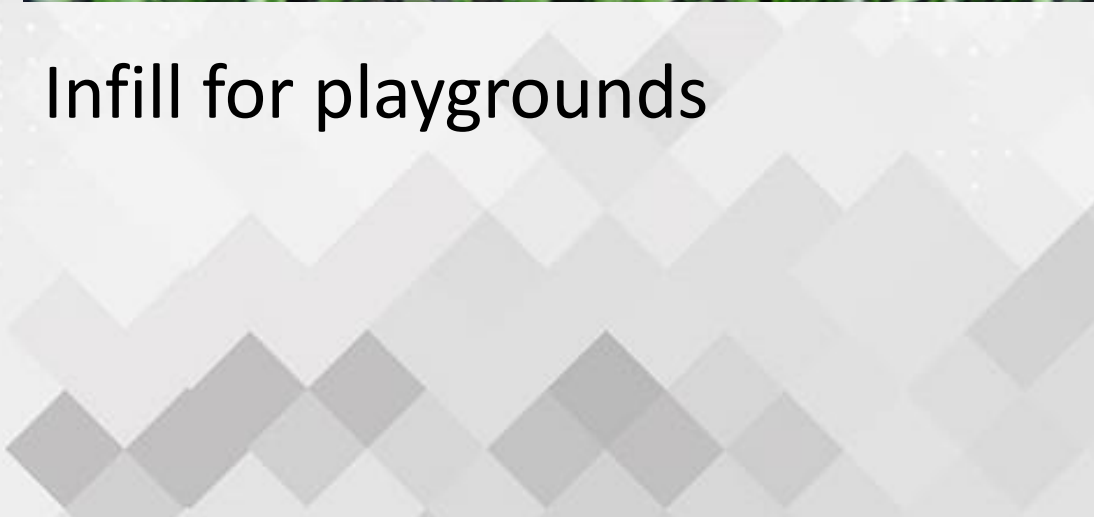

Children's playgrounds

Infill for playgrounds

SBR mulch for playgrounds

Material for further productions
For example soundproofing systems

Collection tyres (SBR) and technical rubber (EPDM)

Processing of SBR RPG

Textile fibre

Steel cord

SBR granulate

Chippings

EPDM granulate

Processing of EPDM and Chippings ASSCO

Products from recycled rubber GELPO
